

Snack / Confectionery with Filling Manufacturing Line

Versatile, high capacity pop-corn type snack manufacturing line. The main machine the AS 56III is a twin screw extruder. The twin screw is made of a special Chromium-Moludenum-Aluminium alloy for consistent product quality and lasting use. This twin screw extruder is so versatile that when combined with centre-filling machine, oven, former-cutter machine and seasoning machine, you can produce literally hundreds of types of pop-corn snacks, biscuits and biscuits with centre cream fillings.

Model : AS 56III
