

OUR PHILOSOPHY

For us, quality means aligning our products and services to the needs, wishes and expectations of our customers.

We do this by continuously improving our products and solutions, which enables us to enhance customer satisfaction and remain profitable.

As profitability is a key requirement for any company that wants to survive, ensuring that we achieve our quality targets is a one of the main tasks of our management team.

For the assessment of the performance of our staff members, the quality of their day-to-day work is therefore a major factor. Our employees know that what they do is important and enables us to achieve our quality targets.

We make sure that responsibility is shared between functional divisions and across all levels within the corporate hierarchy, whereby each employee takes full responsibility for the quality of his or her work.

TAMPER EVIDENT LABELLING

The compact table unit was developed to apply a tamper evident label to small pharmaceutical cartons - before fully automatic lines are adjusted to the product, with this device the products are already sealed.

The tamper evident label can be attached to all closing flaps as required:

M-TE 80

Solution for your smaller, offline labelling applications.

- unique table top solution
- reliable and user friendly
- stable
- designed for transparent and non-transparent labels
- easy changeover to other formats
- repeatable application of labels from product to product
- economical solution

TECHNICAL DATA

M-TE 80	Carton sizes: 40 - 300 mm
innovative desktop labeldispenser for seal labels (L-shape)	
for transparent / non-transparent labels	
core diameter	76 mm
max. outer diameter	200 mm
max. label width	80 mm
winding	outside
power supply	230V - max. 0,5 A

M-TE 80/300	Carton sizes: 20 - 490 mm
innovative desktop labeldispenser for seal labels (L-shape)	
for transparent / non-transparent labels	
core diameter	76 mm
max. outer diameter	300 mm
max. label width	80 mm
winding	outside
power supply	230V - max. 0,5 A
