UNIQUE FEATURES of Sticker Labelling Machines

Plug & Play Sticker Labelling Machine with Built in Standard Features

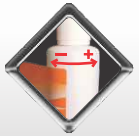

Automatic Label Length Detection

Our Labelling Machines do not require any inputs for Label Length as well as for Gap between Two Labels due to in-built Automatic Label Length Detection System. The Operator is just required to Fix the Label Roll, Machine automatically detect the Label Length and Gap between labels and Operator need to follow simple instruction mentioned in operation manual to run the machine.

Flexible Machine Design

Flexible design to apply labels on various shapes and sizes with the help of adjustments or in some case with the change of few parts.

Label Position Adjustments

To change the Label Starting Position on Bottle is very Simple and User Friendly, adjust the position of Label Sensor to get the desired label position on each product without doing any data feeding or correction, where as the other makes of machines require Data Input or changes in stored data settings such as Time Delay function from time to time.

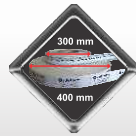

No Change Parts system

In-Built Product Separators system - No Extra Change Parts required for various Vial or Bottle size to run on machine, This Feature is applicable for all round product vertical type Labelling Machine only and Not applicable for Rotary, Linear Rotary and Horizontal Roller / Puck type Labelling Machines.

Synchronization System for Label and Product

Single Speed Pot for easy and simple operation to change the realtime speed of machine without machine stoppage or doing any settings, while many other make machines use different Speed Pots resulting in wastage of Labels, Time and do not allow to change the speed of machine online. Our machines also control the speed of online coding system according to the speed of labelling give precise online labelling and coding operation.

Bigger spool for Label Roll

Largest 400mm Diameter Label Spool, containing more labels in each rolls reducing frequent label change over time for all our models except Flat Bottle Machine model.

Least Change Over Time

Machine with Minimum Change Over time for Change in Label Size due to elimination of Data Inputs / Retrieval System. For Round Bottle Labelling most of the Model having Smart Bottle Separator system which does not require change parts for change in Bottle Size. However, in case of Flat Bottle Labelling or High speed Round Vial / Bottle Labelling Feed Screw required as change parts. Our Machines are simple and user friendly and require couple of minutes for change over in case of standard Round Vial / Bottle Labelling Machine.

Hand Wheel for Label Height adjustment

Machine with Single Hand Wheel system which moves complete Label Dispensing unit up or down as per your requirement to adjust the label position on product easily and quickly.

Lowest Running Cost

Our Machines offer Value for Money with Lowest running cost as compared to other local make machines and having low power consumption, less than 1% failure rate, negligible wastage of costly Labels and eliminate maintenance of stock inventory of mechanical as well as electronic spare parts. The fact is confirmed by many customers with their own experience compared to other brands.

Easy Label Height Changing

Easy to change label application height on bottles, You can adjust the Label application height at any position of bottles, having great flexibility to apply labels as per your needs.

Online Speed Variation Control

Single Point Speed Variation Control - Synchronizing the speed of Labelling, Coding, Camera System, Rejection System, helps operator to manage all function without stoppage of machine increasing efficiency and output of machine.

Widest Label Size Application

The Design of machine is customized and can be supplied as per the Size of Labels. Standard Machine can handle Label Height upto 60/90/120mm Height where as customized machine can handle upto 250mm or more as per customers requirement.

Lowest Maintenance Cost

All of our Sticker Labelling Machines are Virtually Maintenance Free and do not require daily maintenance and lubrication as compared to Wet Glue type or other local make Sticker Labelling Machines. Overall our machines saves valuable time resulting in lowest maintenance due to less down time and less time required for maintenance.

Stainless Steel Construction

All our range of Sticker Labelling in completely Stainless Steel Finish with Heavy Duty SS-304 Machine Frame Structure with SS-304 Enclosures. Our New range of all sticker labelling comes in Newly designed Labelling Head in Completely Stainless Steel Material for Longer, Stronger and Vibration free operation.

Voltage Fluctuation Protection

Our machines work with locally available power supply all over India and do not require any Stabilizer for power fluctuations due to our specially designed * in-built hi-tech control card system for electrical & electronic safe-guards, resulting in protection of electric & electronic systems and components eliminating Production Loss, precious time and replacement costs. Moreover our machines carry 2 years warranty which also covers our immediate supports required any time.

Machine for any Shape and Size of Various Products

We offer wide range of Sticker Labelling Machine for any Shape and Size of Products such as Ampoule, Vials, Bottles, Jars, Pouch, Cartons, Tin, Containers, PFS, Dental Cartridge, Show Box, Shipper Box.

BROTHERS
PHARMAMACH (INDIA) PVT. LTD.

UNIQUE FEATURES of Sticker Labelling Machines

Plug & Play Sticker Labelling Machine with Built in Standard Features

Machine with PLC and Touch Screen Operation

Sticker Labelling Machines can be supplied with Colour Touch Screen System for complete operation of machine, it can also show various information as well as various error messages on screen related to the features opted by users.

Flexible Power Inputs

Our Machines works on 220VAC Single Phase (50hz/60hz) power supply which is easily available or can be supplied for any specific requirement of customer i.e. 110VAC Single Phase

Company Reliability

Experience & Expertise in the field of Pharmaceutical and Packaging Machinery, More than 1700 Labelling Machines supplied by us are working in India and Abroad with Great Satisfaction since last four decades.

Electrical and Electronics

Our Machines equipped with all latest control systems including all electrical and electronic components from internationally reputed companies with great level of performance and reliability with our own support team.

Worldwide Presence

Today the group has a large pool of Satisfied Customers repeating their orders across the Globe including France, USA, Singapore, Indonesia, Malaysia, Pakistan, Nepal, Bangladesh, Philippines, UAE, Jordan, Kenya, Uganda, Ghana, Kenya, Tanzania, Vietnam, Thailand and many others in Asia, Africa and Middle East.

Compatibility for Online Coding

Our Labelling Machines are Compatible for any high Quality Coder of different type such as Thermal Inkjet (TIJ) Coder, TTO Coder, Inkjet (CIJ) Coding, Hot Foil Coder, Contact Coder and Laser Coding.

Plug & Play Sticker Labelling Machine with OPTIONAL Features mentioned below

Toughened Glass Safety Cabinet

All our Machines can optionally be fitted with Safety Cabinet made from Aluminium Profile or Stainless Steel Structure with Toughened (Tempered) Glass or Acrylic sheets to meet current safety needs.

Empty Roll or Low Label Level - Alarm System*

Sticker Labelling Machines can be supplied with Empty Roll Alarm or Machine Stop System, in the event of Label Roll getting empty - system gives Alarm and/or Stop the Machine. Machine also available with Low Label in Roll - Alarm System.

Door Open Machine Stop System*

All our machines having Safety Cabinet can be provided with Safety Switches to prevent occasional accidents due to any human error / mistakes. Safety Switches Stop the Machine as well as give Alarm in the event of any of the Door is open or opened during the operation, which does not allow operator to run the machine with open door for added safety.

Missing Label in Roll Alarm System*

Sticker Labelling Machines can be supplied with Missing Label detection system to check Missing Label in Roll during the Labelling operation, in the event of Missing Label found in Label Roll it gives Alarm and/or Stop the Machine.

Missing Label Detection on Product

Machines available with UV Scanner system to check product without label during online production to avoid unlabelled product transfer to packing conveyor, Machine will stop or give alarm in the event of missing label on product. System works only with UV coated Paper Labels only, in case of Film Labels or Labels without UV, we have Vision base system for label checking.

Online Bottle Ejection System*

Our Sticker Labelling Machines can be supplied with Optional online Bottle Ejection System which eject the bottle online without stoppage of machine. System eject the bottle in the event of receiving Trigger / Signal from machine control system which generate trigger based on optional items provided on machine such as Vision System for Label / Over Coding Checking, Barcode / 2D Code checking, Different Colour Cap, Product without Label etc.

Vision system for Checking Labels*

Sticker Labelling Machines can be supplied with Online Vision (Camera) system for checking / verifying various detail on Labels and in the event of any error found it gives Alarm and / or Stop the machine. Vision system can check any Coding data on Labels, Barcode, Pharmacode and also 2D Matrix code depending on the model selection.

Tower Light Showing Machine Status*

Sticker Labelling Machines can be supplied with Tower Light indication system for showing the status of Machine, it can give status during the online operation, Stand by mode or Error mode for ease of operator or supervisor away from the machine.

Features Marked with  is not a part of Standard Machine but available as Optional Features at an Extra cost on request.

UNIQUE FEATURES of Sticker Labelling Machines

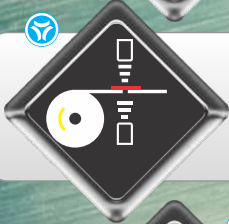

Plug & Play Sticker Labelling Machine with Optional Features

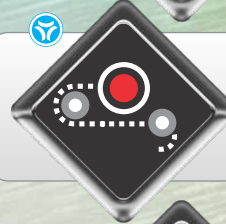

Rejection BIN with Rejection Confirmation as well as Bin Full Detection System

Castor Wheel for easy machine movement

Label Roll Splice Detection System

Label Roll Wastage Spool Full Detection System

21CFR Compliance

Multiple Label Application to Single Product

LABEL MASTER Software

Label Removal from Roll and Collection for reconciliation and report, Our Latest Development of LABEL EJECTION PATENT PENDING

Missing Cap Detection System

Infeed Product Jam Sensor

Different Colour Cap Detection System

UPS System

CE Marking

Complete Single PC Based operation to control Machine, Printer, Camera etc.

Outfeed Product Jam Sensor

Low Air Machine Stop System for any Pneumatically Operated Control System if any provided on machine.

EJECTION SYSTEM (Patent Pending)
Our 600 Series Rotary Ampoule / Vial Sticker Labelling with unique Online Product Ejection system which does not required Compressed Air or Vacuum as well as Star Wheel etc. and works at speed upto 600 Products per minute.

TRACK & TRACE
Our Range of Sticker Labelling Machines are available with ONLINE Track and Trace application

Features Marked with is not a part of Standard Machine but available as Optional Features at an Extra cost on request.
