

Comexi reinforces its commercial structure in Italy and Southeast Europe

Andrea Campani joins the company's professional team, contributing with his extensive experience in machinery for flexible packaging

Girona, 14 March 2017. Comexi, global leader in solutions for the flexible packaging converting industry, strengthens its commercial team in Italy and Southeast Europe with the incorporation of Andrea Campani as the company's area manager in this zone.

Its recent incorporation is part of Comexi's commitment to form a team of experts and recognized professionals that allow the group's expansion in different key markets.

Andrea Campani has 27 years of experience in the production of machinery and equipment for flexible packaging. He stands out for his extensive knowledge in flexographic printing, offset printing, rotogravure printing and slitting. Campani will operate from Piacenza - Comexi's headquarters in Italy- from where he will serve the entire area. "For me, it is a great satisfaction to work in a reference company such as Comexi", says Andrea Campani. Comexi's manager area emphasizes its willingness to maintain the good work developed by the company, offer an optimal customer service and increase the presence of Comexi throughout the region, fulfilling the growth plans of the group. "We want to improve the productivity and efficiency of our customers, listening carefully to each one of them and detecting their needs," he emphasizes.

With this incorporation, Comexi wants to fortify its leadership in this region, key market for the growth plans develop by the firm. "We want to be closer to our customers located in this region by taking advantage of our headquarters in Piacenza to provide an agile and quality service to all the group's product lines such as flexographic, rotogravure, offset, laminating and slitting", highlights Comexi's Corporate Director of Market, Jordi Pujol.

Seven years ago Comexi acquired the Italian company Acom, thus integrating 65 years of experience in the sector and a leading technology in rotogravure printing. Currently, Comexi has a delegation of 4,500 square meters in Piacenza in which has an extensive team of professionals, engineers, commercials, administrative and technical staff that offer the best customer service, quickly and directly. Specifically it is from these facilities located in Vigolzone (Piacenza) that the group manufactures the most advanced solutions in rotogravure printing such as the Comexi R2, Comexi Excel and Comexi Platinum. Presses that stand out for their high productivity, quality and its wide range of applications targeted for the food sector, labels or pharmaceutical products. Technological solutions perfectly suited to today's demanding markets looking for high print quality with high reliability and efficiency.

About Comexi - <http://www.comexi.com>

Comexi has extensive experience in manufacturing equipment for the flexible packaging conversion industry. World leader, it runs five product lines, each specialised in a different conversion process: flexography printing, offset printing, rotogravure printing, laminating, slitting and logistic complements.

The company has more than 36,000 sqm. distributed over three production centers in Riudellots de la Selva (Girona, Spain), Brazil and Italy. Furthermore, its widespread sales network extends to more than 100 countries, providing an answer to all its client's needs.

Comexi includes the Manel Xifra Boada Technological Centre where the company provides support and transfers its knowledge to the various groups involved in the flexible printing industry process.
