

Multisac Flexible Packaging Reinforces Its Confidence in Comexi with the Acquisition of an ML2 Laminator

It is the seventh Comexi machine purchased by the Portuguese company, which has three slitters, a flexographic press and two other laminators

Girona, March 25, 2021.- Comexi, a specialist in solutions for the flexible packaging printing and converting industry, and Multisac Flexible Packaging (Multisac), a leading company in the Portugal's flexible packaging sector, have extended their strategic partnership with the acquisition by the Portuguese company of a laminator Comexi ML2. The relationship between the two companies dates back to 2008 when Multisac Flexible Packaging purchased a Comexi Compack 2 slitter. Presently, the company has six Comexi machines: one flexographic press, two laminators, and three slitters. The new Comexi ML2 will be the company's third laminator and the seventh Comexi machine.

Multisac Flexible Packaging ([multisac.pt/en](https://www.multisac.pt/en)), a company dedicated to the production and selling of flexible packaging, primarily uses the following technologies: flexographic printing, digital printing, solventless and solvent-based laminating, and rewinding. In addition to operating in the domestic market of Portugal, Multisac exports its products to Spain, France, and Portuguese-speaking African countries. The company is based in Vouzela, approximately 30 km from the city of Viseu.

"We are very satisfied with our Multisac Flexible Packaging partnership. The sale of seven machines conveys that the trust between the two companies is extremely good, and we must continue working daily in order to maintain it," says David Morera, the Regional Sales Director of Europe at Comexi. "Yearly, Multisac Flexible Packaging is growing. We are happy that Comexi can contribute to this growth with our machinery, as is the case of Multisac's ML2 laminator purchase".

The Comexi ML2 offers complete versatility with various types of flexible packaging applications. The machine allows applications such as heat seal, cold seal, matt and gloss varnish coatings, solvent and water-based laminating, solventless laminating, and many more possibilities, all in

one laminator. With its ergonomic design, daily operations can be rapidly performed, thus maximizing production.

About Comexi – www.comexi.com

Comexi, founded in 1954, has extensive experience in manufacturing equipment for the flexible packaging conversion industry. As a world leader, it operates five product lines, each specialized in a different conversion process: flexography printing, offset printing, laminating, slitting, and digital services. Furthermore, it has a Service and Technical Assistance Business Unit that offers service 24 hours a day, 7 days a week.

The company has two production plants: one in Riudellots de la Selva (Girona, Spain) and another one in Montenegro, in the State of Rio Grande do Sul (Brazil). There are also two offices in Miami (USA) and Moscow (Russia). Moreover, Comexi is represented in more than 100 countries. This commercial network allows us to have proximity to our customers in order to optimally respond to their needs.

Comexi includes the Manel Xifra Boada Technological Centre, Comexi CTec, where the company provides support and shares its knowledge with various groups involved in the flexible printing industry process.
