

Ip3 Desarrollos Reinforces Its Confidence In Comexi's State-Of-The-Art Technology And Service

The Spanish company incorporates a Comexi F2 MB flexographic press and a Comexi SL2 MB laminator to its facilities located in Sueca (Valencia)

Girona, June 16, 2021.- Comexi, a specialist in solutions for the flexible packaging printing and converting industry, and Ip3 Desarrollos, a company dedicated to the manufacture of flexible packaging, have reached an agreement to acquire a Comexi F2 MB flexographic press and a Comexi SL2 MB laminator. The two machines will be installed at the Spanish company's headquarters in Sueca (Valencia). The company already has a flexographic press, a multipurpose laminator, and a Comexi slitter at this location.

"From its inception, Ip3 Desarrollos trusted by acquiring an entire line of printing, laminating, and slitting machines", explains David Morera, Comexi's Regional Sales Director of Europe. Time has shown that this decision made by the Spanish company was successful, and currently, seven years later, it has trust, once again, in the technology and services of Comexi. "The machines have demonstrated the performance expected by Ip3 Desarrollos. The company is extremely satisfied with the offered services. These primary reasons are the most valued in an operation of this relevance, and are complimented by an excellent relationship between the two companies. Consequently, these reasons have made it easier for Ip3 Desarrollos to trust us again," comments David Morera, who admits his satisfaction with the "trust, fidelity, and loyalty" of Ip3 Desarrollos, and highlights that "Comexi is an advanced company and a leader in technology development. Furthermore, our prices are competitive, and we strive to offer the high level of service that our clients deserve. We have made an extreme effort to facilitate the continual side-by-side growth of our relationship with Ip3 Desarrollos."

Beginning operations in 2015, Ip3 Desarrollos specializes in the manufacture of flexible packaging solutions primarily for the food sector. The Spanish company, which operates largely in the Spanish, French, and Portuguese markets, produces the highest quality flexographic printing and laminations with or without solvents. Ip3 Desarrollos also manufactures client customized reels, which are individually packed, labelled, and come with the guarantee provided by its management system for certified food safety in accordance with BRC standards.

The Comexi F2 MB central drum press is designed to satisfy the medium print run needs of the retail and wholesale channels within the flexible packaging sector. This flexographic press has the patented FLEXOEfficiency concepts of ergonomics and accessibility, as well as the performance level and robustness familiar to the Comexi brand. All of these features are integrated with a simplified drying system design. Undoubtedly, the Comexi F2 MB is an extremely productive and high-performance machine that meets the needs of the most demanding jobs.

The Comexi SL2 MB is an ideal flexible packaging laminator designed for beginning converters or those managing a large number of printing projects which do not require high tensions. Due to the efficiency and compactness of the machine, the Comexi SL2 MB has an exceptionally intuitive user interface, making it extremely easier for operators to use.

About Comexi – www.comexi.com

Comexi, founded in 1954, has extensive experience in manufacturing equipment for the flexible packaging conversion industry. As a world leader, it operates five product lines, each specialized in a different conversion process: flexography printing, offset printing, laminating, slitting, and digital services. Furthermore, it has a Service and Technical Assistance Business Unit that offers service 24 hours a day, 7 days a week.

The company has two production plants: one in Riudellots de la Selva (Girona, Spain) and another one in Montenegro, in the State of Rio Grande do Sul (Brazil). There are also two offices in Miami (USA) and Moscow (Russia). Moreover, Comexi is represented in more than 100 countries. This commercial network allows us to have proximity to our customers in order to optimally respond to their needs.

Comexi includes the Manel Xifra Boada Technological Centre, Comexi CTec, where the company provides support and shares its knowledge with various groups involved in the flexible printing industry process.
