

Comexi Celebrates New Success After Reaching the 150th Sale of the S2 DT Compact Turret Slitter

Reliable and robust, it offers unique tension control among the slitters in this range and high productivity as a result of its rapid acceleration ramps

Girona, July 22, 2021.- Comexi, a specialist in solutions for the flexible packaging printing and converting industry, celebrates a new success after the acquisition of an S2 DT compact turret slitter by the Guatemalan company, Polifisa. Consequently, the Catalan company has reached 150 sales of S2 DT family slitters, and currently has more than 350 double turret machines on the market (including sales from the S1 DT group of machines).

“The S2 DT compact slitter has led to a revolution in the flexible packaging sector. With the increasing pressure to reduce costs and growing need to produce more efficient and productive solutions, the Comexi S2 DT offers an unbeatable performance/cost ratio,” explains Raúl El-Fakdi, director of the Comexi Slitting business unit, who adds that “the company's commitment to offer quality-guaranteeing solutions, while simultaneously addressing the needs of our customers, could not give any other result than that of a leading position in technology, which is, once again, supported by the market, as is evident, with the increasing number of sales.” The Comexi S2 DT slitter is primarily sold in the European (40%) and American (40%) markets.

Reliable and robust, the Comexi S2 DT is a state-of-the-art machine created to offer high productivity as a result of its superior flexibility and rapid acceleration and deceleration ramps. In regard to slitters within this group, the Comexi S2 DT has a unique tension control and offers a high level of material versatility, thus being able to work with low-micron, breathable PE, aluminum, and paper. Operating the Comexi S2 DT is extremely straightforward and intuitive, due to the enormity of work which has been done to provide a pleasant, comfortable, and agile interface. This slitter, equipped with a turret system to streamline project changes, is especially useful to the company that needs to produce numerous reels. With the Comexi S2 DT, quality and quantity are not incompatible.

About Comexi – www.comexi.com

Comexi, founded in 1954, has extensive experience in manufacturing equipment for the flexible packaging conversion industry. As a world leader, it operates five product lines, each specialized in a different conversion process: flexography printing, offset printing, laminating, slitting, and digital services. Furthermore, it has a Service and Technical Assistance Business Unit that offers service 24 hours a day, 7 days a week.

The company has two production plants: one in Riudellots de la Selva (Girona, Spain) and another one in Montenegro, in the State of Rio Grande do Sul (Brazil). There are also two offices in Miami (USA) and Moscow (Russia). Moreover, Comexi is represented in more than 100 countries. This commercial network allows us to have proximity to our customers in order to optimally respond to their needs.

Comexi includes the Manel Xifra Boada Technological Centre, Comexi CTec, where the company provides support and shares its knowledge with various groups involved in the flexible printing industry process.
