

Dear Euromac friend,

Euromac has the pleasure to personally invite You and / or Your team members to the K2016, the No. 1 tradefair for Plastic and Rubber. The Trade fair takes place in the MESSE Dusseldorf in Dusseldorf, Germany.

**EUROMAC PRESENTS:**

At the **K-2016** Euromac showcases an integration of best practice, implementing the BST eltromat international's top of the range PQ CHECK with backlight within **EUROMAC's** CB800 doctor rewinder. You are treated in receiving first hand demonstrations of the many possibilities of the machine also in respect of inspecting printed and non printed film, laminates and other substrates.

The inspection system is further equipped with the PPQ REWINDER NAVIGATOR / WORK FLOW, and supplied with 23" Touch screens for operator friendly operations. The system is fully developed to detect, map and eventually remove the material by the operators help in association with the supplied splicing table, the systems handshake between the inspection system and the EUROMAC CB800 make it possible to stop the machine at the indicated print defects, saving operators valuable time and increasing the overall guaranteed product quality. This transmits directly to the company's image and the overall end clients satisfaction.

Next to the doctor rewinder Euromac showcases we propose also the **TB3.08M**, with duplex slitter rewinder. Its main characteristics: linear tracking rewind shaft system capable of rewinding till diameter 850 mm at high speeds of 800 m/min; equipped with the latest Siemens Motors, Drives and PLC; automatic shifting in relation to the diameter of the finished reel (with Siemens servomotor); contact rollers in fixed position, with reduced path, comfort access and a full automatic knife setting system, demonstrable on site.

**You will find the Euromac Stand in: Hall 3 Stand 3D33.**

We are looking forward receiving You on the stand.

Best regards,  
**EUROMAC**
