

TB-3.08P VERSATILE DUPLEX SLITTER

The introduction of the latest TB-3.08p slitter rewriter has proven to be a very good success especially among converters for flexible packaging for food pharmaceutical products.

The machine is based upon the TB-3 with hundreds installations worldwide. The development consist also in the compact and ergonomic position of the unwind stand and relevant webpath. The machine has a smaller footprint though maintaining the full specification and features.

Key features are:

- compact overhead webpath
- ergonomical access to slitting blades
- smaller footprint
- Rewind diameter 800 mm
- Re-reel diameter lower shaft 1000 mm

TB-3 remains in the production program and is utilised i.e. when unwind roll diameter is > 1000 mm
