

Nichrome participates in AgroProdMosh 2015

October – 2015

In continuation with our long fruitful association, we are glad to serving you with our most advanced and innovative solutions for Dairy product packaging. Introducing new premium quality dairy product packaging machine - Filpack Servo Universal (SH) - for safer, faster and accurate packaging! The machine's Twin Servo Pneumatic Piston Filler is ideal for liquid milk and viscous products like Smetana, Kefir, Shrikhand, Yougurt, Lassi etc.

Filpack Servo Universal (SH) provides integrated yet cost-effective dairy packaging solution allowing the dairy manufacturers to pack all their liquid and viscous products hygienically at high speeds and accurate weight in user friendly pouch format.

Nichrome's Filpack Series brings the next revolution in milk and viscous products packaging. With a strong global presence, Nichrome is re-launching its machines in the forthcoming Russian exhibition where its latest innovation will be introduced to the Russian market.
