

PRESS RELEASE

PDC Europe & EOS Skin Evolution
October 2016

EOS' Skin Evolution, a seductive and sensory packaging experience!

Made in France, EOS' Skin Evolution sleeve brings you an extensive color range, exclusive and sophisticated design along with a soft and luxurious touch: the Skin Evolution is THE trendsetter!

This unique and patented design with a no seal look allows a 360 ° dramatic decoration for any container.

Designers can have them texturized on demand (fabric, leather, painting, lacquered look...). Smart packaging is also possible: connected devices, color-shifting or anti-counterfeiting sleeves. The sleeves can also include a cut-out window!

Fast and easy! The Skin Evolution can be stretched either onto empty or full containers. No heating nor water spraying is necessary!

Come discover EOS' Skin Evolution on PDC Europe's booth at All4Pack Paris exhibition!

PDC is THE industrial partner for Skin Evolution applications!
