

LabelExpo: Zecher presents the benefits of SteppedHex engraving

At LabelExpo Europe, Zecher will be informing their trade visitors once again about the best anilox roller solutions with a team of experts at stand E33 in hall 5.

"LabelExpo is one of the most important international trade fairs in the labeling and packaging industry, which is why it is important for us to be represented here," says Thomas Reinking, Zecher Sales Manager.

The focus will be on the innovative SteppedHex engraving with all its advantages. The tried-and-tested SteppedHex technology is based on an application of the parameters of 60° engraving, while offering an alternative to it and additional benefits.

- Increased resolution without loss of volume
- Remarkable cost and color savings
- Improved emptying performance
- Uniform and homogeneous ink-transfer
- Suitable for all inking systems

Likewise, Zecher will inform about the possibilities of laser cleaning.

If you would like to receive advice on individual solutions, contact the Zecher expert team at stand E33 in hall 5.

About Zecher

Zecher GmbH is an international manufacturer of chrome and ceramic anilox rollers. With continuous further developments and various innovations in the field of printing technology to its name, Zecher currently counts on 70 years' experience in the manufacture of anilox rollers. Zecher produces more than 12,000 engraved anilox rollers annually at its main plant in the German town of Paderborn.
